ARTIFICIAL INTELLIGENCE IN MARKETING MANAGEMENT

End Term Assessment Project

PROJECT OVERVIEW

1.1 Project Title

Development of an AI-Powered Competitive Product Strategy and Market Entry Plan

1.2 Learning Objectives

- Apply AI technologies to develop comprehensive marketing strategies for new product development
- Utilize no-code AI platforms to analyze competitor products and identify market opportunities
- Implement ethical AI frameworks in marketing research and customer targeting
- Create AI-driven personalization strategies and brand positioning frameworks
- Develop data-driven marketing mix optimization using artificial intelligence tools
- Evaluate the strategic impact of AI implementation across the entire customer journey

1.3 Project Context

Business Scenario:

You are a Marketing Strategy Consultant hired by an emerging startup to challenge an established product in the online marketplace. Your task is to select an existing successful product from any major e-commerce platform and develop a comprehensive AI-powered strategy to launch a competing product that can capture significant market share.

Challenge Requirements:

- Select ONE existing product from online shopping platforms
- Create a NEW competing product concept
- Develop a complete AI-driven marketing strategy to rival the existing market leader
- Demonstrate practical application of AI across all marketing functions

Tools:

Use the tools covered during the classroom and you are free to use another tool as per your preference

PROJECT REQUIREMENTS AND DELIVERABLES

3.1 Phase 1: AI-Driven Market Research and Competitive Analysis

Deliverable 1A: Product Selection and Competitive Intelligence Report

Students must:

- Select and justify choice of existing product from online marketplace
- Conduct comprehensive competitive analysis using AI tools
- Analyze customer reviews, ratings, and feedback patterns using sentiment analysis
- Identify market gaps and opportunities for differentiation
- Create competitor SWOT analysis with AI-generated insights

Deliverable 1B: Customer Journey Mapping and Persona Development

Students must:

- Map complete customer journey from awareness to advocacy
- Develop 3-5 detailed customer personas using AI-assisted segmentation
- Analyze buying decision processes and pain points
- Create customer empathy maps with behavioral insights
- Document personalization opportunities at each touchpoint

3.2 Phase 2: AI-Enhanced Product Development and Brand Strategy

Deliverable 2A: New Product Concept Development

Students must create:

- Innovative product concept with unique value propositions
- AI-driven feature prioritization based on customer needs analysis
- Product positioning strategy using AI competitive mapping
- Brand identity development with AI-assisted creative elements
- Value creation framework demonstrating competitive advantages

Deliverable 2B: Brand Equity and Network Strategy

Students must develop:

- Brand equity building strategy using AI insights
- Standardization vs. personalization vs. hyper- personalization framework
- Brand network effect analysis and leveraging strategies
- Competitive response strategies using AI monitoring
- Brand sustainability and ethics integration plan

3.3 Phase 3: AI-Powered Marketing Mix Optimization

Deliverable 3A: Strategic Marketing Mix (4Ps) with AI Integration

Product Strategy:

- AI-enhanced product development roadmap
- Personalization and hyper-personalization strategies
- Service design using AI insights

Pricing Strategy:

- Value-based pricing optimization
- Revenue model innovation using AI insights

Promotion Strategy:

- AI-driven content marketing calendar
- Social media automation and engagement strategy
- Personal selling enhancement using AI tools
- Integrated marketing communications plan

Place Strategy:

- Digital distribution channel optimization
- Retailing strategy in the AI age
- Omnichannel customer experience design

3.4 Phase 4: Implementation Roadmap and Ethical Framework

Deliverable 4A: Marketing Technology Implementation Plan

Students must create:

- 15-day marketing launch timeline with AI tool integration
- Budget allocation for AI marketing tools and platforms
- Team structure and skill requirements for AI implementation
- KPI framework and success metrics definition
- Risk assessment and mitigation strategies

Deliverable 4B: Ethical AI Marketing Framework

Students must address:

- Privacy and data protection compliance strategy
- Bias prevention in AI-driven targeting and personalization
- Transparency in AI-powered customer interactions
- Sustainability considerations in AI marketing implementation
- Ethical guidelines for customer data usage and AI decision-making

SUBMISSION REQUIREMENTS

4.1 Digital Portfolio Structure

Students must organize submissions according to the following structure:

```
